

SAS VP intersociety relations – Adrian L. Burke

Annual Report for 2019

I organized the GMPCA conference here in Montreal. There were 140 participants which makes it a medium-sized archaeometry conference, just after ISA. It was partly sponsored by SAS and we also gave out two student prizes. I also helped Andrew Zipkin (social media) on occasion regarding how we co-sponsor or collaborate with other societies (e.g. Sci-X), primarily in terms of their conferences and SAS prizes given out at other conferences on archaeological sciences. Most other intersociety business (e.g. ISA) was handled directly by the president.
